---

Armin is a pioneer in both the compliance and voluntary carbon markets. Since the 1990s, he has actively supported the market's development, initially for the German government. Currently, he advises investors in the carbon market as well as in the field of biodiversity finance and credits.

In addition to participating in numerous UN climate negotiations for the finance industry, he has published numerous articles on the topic and moderates events in this field.

Armin holds a PhD in environmental and resource economics.

---

Armin is offering strategic advice to grow business in climate related investments, in particular:

- Identifying areas of growing interest/trends for institutional investors and asset managers in the field of carbon and nature based related sustainable finance
- Raising profiles with institutional investors and asset managers in certain geographical areas
- Reviewing and assessing of new fund products
- Identifying reliable institutional targets for partnerships
- Participating in investment committees and/or board memberships
